

## Red Hill Contract Announcement – 25 Aug 15

Hensel Phelps Construction Co., Honolulu, Hawaii, is being awarded a \$42,823,800 firm-fixed-price contract for the upgrade of the fire suppression and ventilation systems at Red Hill Fuel Storage Facility at the Naval Fleet Logistics Center, Joint Base Pearl Harbor-Hickam. The work to be performed provides for a wet pipe water fire sprinkler system in the upper access tunnel and automatic aqueous film forming foam (AFFF) water fire suppression system in the lower tunnel. Provide a new 250,000-gallon water storage tank, two fire pumps, fire pump building, hydrants, and fire protection water supply lines. Provide collection pits with sump pumps and an exterior 153,000-gallon retention tank for disposal of AFFF and fuel. Repair existing and provide additional oil tight doors along the tunnel. Provide new emergency voice and fire alarm system throughout the tunnel complex. Upgrade ventilation systems to explosion proof fixtures. Integrate ventilation system with existing emergency system controls. Work will be performed in Oahu, Hawaii, and is expected to be completed by September 2017. Fiscal 2015 military construction (Defense) contract funds in the amount of \$42,823,800 are obligated on this award and will not expire at the end of the current fiscal year. This contract was competitively procured via the Federal Business Opportunities website, with two proposals received. The Naval Facilities Engineering Command, Pacific, Joint Base Pearl Harbor-Hickam, Hawaii, is the contracting activity (N62742-15-C-1308).
